*Improving Dentistry Through Education*

## **IN-PERSON DENTISTRY CE OPTIONS**

---

**Jennifer Hertzoff, CVT** started her career in General Practice in 1982 and always had a strong interest in dentistry. She had the rare opportunity to work with 5 boarded dentists at Arizona Veterinary Dental Specialists for over 17 years. Jennifer uses her years of experience along with her passion for teaching to help improve the dentistry knowledge and skills of your entire staff!

### **All classes are customized to suit your team's needs, experience and goals**

**Fundamentals Lecture - 2 hours** (Time can vary upon request)

**Covers just about everything the entire staff needs to know about dentistry!**

Anatomy of the mouth and oral cavity

Stages of periodontal disease

Identifying pathology and treatment options

Dental x-ray interpretation & radiation safety

Step-by-step teeth cleaning techniques with videos

Client education and marketing

Safe anesthesia protocols

Home care products and much more...

**Class notes and On-Demand recorded lecture will be provided**

**Dental X-ray Positioning Lab - 4 hours** (Time can vary depending on staff size)

**Taught mostly with landmarks as opposed to geometry!**

Up to approx. 10 participants

Participants will learn to take full mouth x-rays quickly & easily

I will demonstrate every position on a cat and dog skull

Each person will practice with my guidance

Learn how to identify a diagnostic x-ray and fix mistakes

I bring natural bone skulls with me (Cadaver heads can be used)

**Dental X-ray Positioning Guide & live animal positioning video included**

### **Additional Lab Portions**

Time needed varies with amount of participants

#### **Prophy techniques:**

I will bring prophy instruments with me

Discussion and demonstration on models of hand instrument usage

I will walk your team through a proper Dental Prophylaxis - Step by Step.

#### **Extraction Instruments:**

I will bring extraction instruments with me

-Which ones are recommended & discussion of basic techniques

#### **Nerve block placement**

#### **Instrument sharpening instruction**

#### **Clinic's Instrument & equipment evaluation**

**Live Patient Demonstration:** (Only offered if anesthesia protocols are optimal)

I will perform a complete dental prophylaxis on an employee's dog

Dog should be 20-40# with approximately Stage 2 Periodontal Disease

I will take full mouth dental x-rays, perform a professional teeth cleaning and charting

**\*Courses are RACE approved for CE credits for Veterinarians and Technicians**
