

## LIVE ONLINE DENTISTRY COURSES

---

### GET EXCITED ABOUT DENTISTRY!

#### Live webinars are booked for your team at a time that works for your schedule

**Customizable** - Live classes are created to suit your specific needs

**Recorded** - Recording of your webinar will be provided to you after the class

**RACE approved** - All live classes are RACE approved for CE credits for technicians and veterinarians

#### About your speaker:

##### Jennifer Hertzoff, CVT

Jennifer has worked in the veterinary field since 1984 and always had a special interest in dentistry. She had the rare opportunity to work at Arizona Veterinary Dental Specialists for over 17 years. The material taught in these classes is obtained from working closely with 5 board certified veterinary dentists and a boarded anesthesiologist. Jennifer has the ability to convey the information that she learned in a way that it is easily incorporated into any practice. Her goal is to help your team increase their dentistry skills, knowledge and efficiency through practical and engaging online classes.

#### LIVE COURSES:

##### Fundamentals of Dentistry Lecture (2 hours)

**A little about almost everything you need to know about dentistry**

**Can be done in a 2 hour webinar or in 2 separate 1 hour classes.**

##### Dentistry Basics (1 hour)

- Anatomy of the mouth and oral cavity
- The stages of periodontal disease
- Identifying oral pathology
- Malocclusions
- Treatment options
- What is appropriate to refer and why
- Radiation safety
- Importance of dental x-rays
- Dental x-ray interpretation

##### Periodontal Therapy (1 hour)

- \*Anatomy of the oral cavity
- \*Equipment needed for dentistry
- \*Hand Instrument recommendations and usage
- \*Safe anesthesia protocols
- \*Step-by-step teeth cleaning techniques with videos
- \*Charting techniques and abbreviations
- \*Client education and marketing
- \*Doxirobe indications and proper placement
- \*Dental Delivery Unit maintenance
- \*Instrument sharpening
- \*Home care products

##### Dental X-Ray Positioning

***Dental X-Rays are more like an art than a science***

I teach using landmarks and not geometry to make learning easier

### **Live powerpoint (1 hour)**

Equipment needed  
Radiation safety  
X-ray orientation - Left, right, upper, lower  
Pictures and description of every angle & troubleshooting tips

### **Live interactive coaching (2-3 hours)**

Must watch Introductory On-Demand class and Powerpoint before

Knowing how to fix mistakes is half the battle  
I watch participants take x-rays on skulls and critique positioning techniques  
Participants watch me and I watch participants take full mouth dental x-rays  
(Clinic needs to have real medium dog skull, adult cat skull and 4 play-dough containers)

### **Dental X-Ray Interpretation (45 min)**

#### **Artifact or Abnormality?**

Dental radiographs are important but, you need to know what you are looking at  
Avoid misdiagnosing oral pathology  
I will help you navigate radiographic structures to determine if the view is normal or if there is anything of concern.  
I will also cover what treatment options are appropriate and why.

### **Periodontal Therapy (1 hour)**

#### **Learn the correct way to perform a Professional Teeth Cleaning**

Why is proper dental care important  
Stages of periodontal disease  
Equipment needed  
Hand Instrument recommendations and usage  
Step-by-step teeth cleaning techniques with videos  
Charting techniques and abbreviations  
Client education and marketing  
Doxirobe indications and proper placement  
Safe anesthesia protocols  
Equipment maintenance  
Instrument sharpening  
Home care products  
Dental delivery unit maintenance

**Notes will be provided**

### **Bonded Sealants (30 min)**

#### **When and How**

Bonded sealants are a great addition to your dental program. They can be more harm than good if done incorrectly or for the wrong reason. Learn when to do a bonded sealant, how to do it and what products & equipment you need  
Items needed printable list is provided

### **Anesthesia Tips (45 min)**

#### **Dental procedures are important but, not nearly as important as the anesthesia!**

Learn tips I have learned while working with a Board-Certified Veterinary Anesthesiologist, Dr. Victoria Lukasik  
I can help you make your dental procedures safer with these important points

### **Client Education & Compliance (45 min)**

#### **How to talk to clients about dentistry**

Education is the best way to make you clients understand the importance of dentistry!  
Learn about dentistry in a way that it's easy to understand and then to be able to convey that information to your clients.

### **Instrument Sharpening**

#### **Dental procedures are better and faster with sharp instruments!**

#### **Powerpoint with Live Practicing (1 hour)**

Use of stones or honing machine  
Flat and conical stones are needed  
I will demonstrate and explain sharpening techniques  
I can watch you do sharpening and I give pointers

### **Nerve Blocks (30 min)**

#### **Nerve blocks provide a valuable tool for pain management**

Learn the correct way to place nerve blocks  
Reduce the amount of anesthetic gas needed during extractions  
Less discomfort post procedure

### **Extraction Tips, Instruments & Equipment (45 min)**

#### **Make you extractions as easy as possible!**

Equipment & Instruments needed  
What size handle is best for you  
Instrument usage techniques  
Burrs & suture recommended  
Which nerve blocks for which teeth

### **Dentistry Equipment & Instrument Must Haves (45 min)**

#### **What you really need to perform dental procedures**

I have used most dental products on the market  
I can give you an unbiased opinion on all dental items  
Pictures and descriptions of recommended instruments, products and equipment  
How everything is used and where to get them
